Dear Hiring Manager,

I am writing to express my interest for the Software Engineering Internship position in the Western Digital. As a final year in Bachelor of Information Technology (Software Engineering) student at University Tun Abdul Razak (UNIRAZAK), I am eager to apply my technical knowledge and passion for software development to contribute to your team's innovative projects.

During my studies, I have gained hands-on experience in basic programming languages such as java, python, HTML, CSS, PHP, Kotlin and JavaScript. One of my key projects was developing a web application, **Vendor Space**, designed to help vendors find event information such as time, price, location, and other details. I was involved in the full development process, utilizing **HTML, CSS, and MySQL** to create a user-friendly platform. This project improved vendor accessibility to event opportunities and streamlined their planning process. Through this experience, I enhanced my problem-solving skills.

I would like the opportunity to bring my technical skills and creativity to Western Digital. Thank you for considering my application.

Sincerely,

Aiman Haikal Bin Mohd Hazri.
